

**UAS MAPPING**  
THE ART OF MAPPING

# Unmanned Aerial Survey

Book Now

Spatial data capture using Unmanned Aerial Systems/Vehicles (UAS/UAV) is our namesake and a core service we offer to our clients. UAS uses a fleet of multirotor and fixed wing platforms, as well as camera and LiDAR payloads to capture high quality point clouds and imagery with efficiency and accuracy.

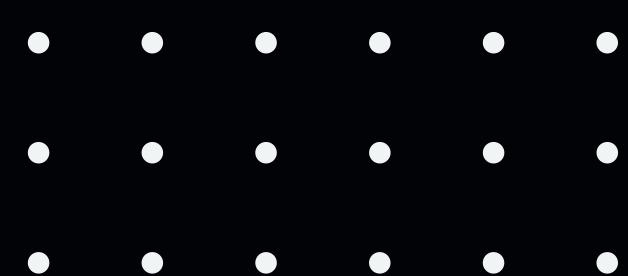

## Output Materials

- Orthomosaics
- Digital surface models (DSM)

- Digital Terrain Models
- Contours
- 3D Textured Mesh
- Volume Estimation

- 3D Point Clouds
- Feature Extraction (customizable based on client's request)
